

Code review protocol for "Exercise 2: The Visual System"

Group members: Jan Wiegner, Diego Salinas Gallegos, Philippe Blatter

Procedure: On the date of the publication of the exercise, we met and discussed the solution. We came up with the formulas and the sequence of computations and made sure that everybody was on the same page. We divided the different work steps so that every team member implemented one part of the solution which we then merged into a final version. Next, we checked the code that the other team members wrote in order to further improve our solution. Finally, we added precise descriptions for the different functions and a header. We all went through the final solution, understood it and found no mistakes.
