Code review protocol for "Exercise 1: The Auditory System"

Group members: Jan Wiegner, Diego Salinas Gallegos, Philippe Blatter

Procedure: On the date of the publication of the exercise, we met and discussed the solution. We came up with the formulas and the sequence of computations and made sure that everybody was on the same page. Next, we all tried to implement a version on our own until one week before the deadline. Then we discussed the different approaches and merged them into a final version consisting of the best and most efficient code. Finally, we added precise descriptions for the different functions and a header. We all went through the final solution, understood it and found no mistakes
